Open Source Case Study

1. ASSIGNMENT OVERVIEW

1.1 For this assignment, you are to work within your Project Groups to conduct research on popular open source web development related projects found in GitHub. Your goals are to:

a. Learn the details about the projects, including their history and development related aspects.

b. Evaluate each project and determine what benefits they offer web developers such as yourselves.

c. Offer suggestions on how the project might be improved.

d. Determine if/how the project may be useful in your own web development efforts, including the Group Project.

1.2 For the subjects of your case study, each group must select either **five (5)** or **four (4)** open source projects from the list below, depending on the number of team members (i.e. teams with five students are to choose five projects, teams with four students will choose four):

- Angular (https://github.com/angular/angular)
- Aura.Auth (https://github.com/auraphp/Aura.Auth)
- Auth (https://github.com/delight-im/PHP-Auth)
- Chart.js (https://github.com/chartjs/Chart.js)
- CodeIgniter (https://github.com/codeigniter4/CodeIgniter4)
- D3 (https://github.com/d3/d3)
- Dompdf (https://github.com/dompdf/dompdf)
- Fabric.js (https://github.com/fabricjs/fabric.js)
- face-api.js (https://github.com/justadudewhohacks/face-api.js)
- Font Awesome Free (https://github.com/FortAwesome/Font-Awesome)
- HTML5 Boilerplate (https://github.com/h5bp/html5-boilerplate)
- LLPhant (https://github.com/LLPhant/LLPhant)
- OpenAI PHP (https://github.com/openai-php/client)
- PHPixie (https://github.com/PHPixie/Project)
- PHPMailer (https://github.com/PHPMailer/PHPMailer)
- Slim Framework (https://github.com/slimphp/Slim)
- Symfony (https://github.com/symfony/symfony)
- three.js (https://github.com/mrdoob/three.js)
- Yii 2 (https://github.com/yiisoft/yii2)
- Zebra_Session (https://github.com/stefangabos/Zebra_Session)

Note: other open source projects not listed above can be considered, subject to approval by your instructor.

1.3 After completing your analysis, your group will consolidate the findings into one single report, consisting of the content indicated in Section 2.

2. REPORT CONTENT

2.1 For *each of the projects* selected, your report should provide the following information:

a. Overview and background of the project:

- What does it do?
- When was the repository first created, and when was the most recent commit to the repository?
- How many developers in total have contributed to the repository since its inception, and who are the top contributors to the project?
- What are the main programming languages used in the repository?
- How many open issues are there currently?
- What is the specific open source software license used by the project?

b. Evaluation:

- What are the strengths of the project, and what makes it popular?
- Are there any weaknesses or areas that could be improved?
- Are there any known security related vulnerabilities?

c. Usefulness/Applicability:

- Would you consider using it in your Group Project or other work? Why or why not?
- Would your team consider becoming contributors to the project? Why or why not?

3. ASSESSMENT

3.1 Your submission will be assessed based on the following criteria:

a. Accuracy of the information provided in the report.

b. Thoroughness of the analysis and evaluation.

c. Relevance and thoughtfulness of the conclusions.

3.2 This is a **group assignment** – your team is to compile a single, consolidated report consisting of the combined work of every team member.

4. SUBMISSION OF ASSIGNMENT

4.1 You must submit your group's consolidated report in **.pdf format** to xSiTe, under **Assessments->Dropbox->Open Source Case Study - Pn** (select the Dropbox Folder

corresponding to your Lab section, P1-P8). Only one person from the group needs to submit (if multiple team members submit to the Dropbox, then only the last submission received before the deadline will be kept).

4.2 This assignment is due by **Friday, 20 March at 23:59**. As this is a group assignment, **late submissions will not be accepted**.
